

Vanderbilt University Schulman Center for Jewish Life
Nashville, TN

PROBLEM OR NEED
Electrical systems and illumination for innovative student center

PUCKETT SOLUTIONS
Consultant to Manuel Zeitlin Architects

Designed building electrical systems

Designed interior and exterior illumination

Included café, assembly hall, performance venue, classroom, and library

As consultant to Manuel Zeitlin Architects, Puckett Engineering provided electrical engineering for an all-new facility that is the center of Jewish life at Vanderbilt. The Schulman Center serves the religious, social, and educational needs of Jewish students. The 10,000-square-foot building provides a Kosher vegetarian cafe, a student lounge, an assembly hall, and a multipurpose space that doubles as a sanctuary and performance venue. The second floor of the building houses a classroom, offices and a library. Puckett Engineering's services included design for building electrical systems, controls, and interior and exterior illumination.

Year Completed: 2002
