

CASE STUDY

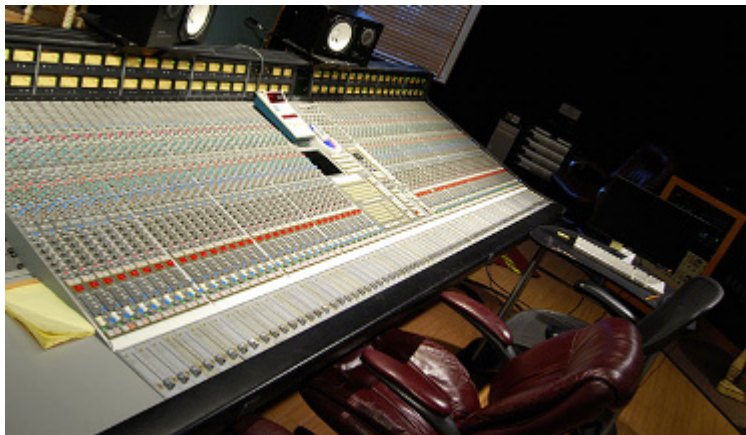

Recording Studio

Sound Kitchen Studios

Franklin, TN

The Sound Kitchen needed to expand their existing recording studio facility to add additional control rooms, studio, isolation booths, lounge, offices, and supporting spaces. Puckett Engineering's solutions included:

- Electrical service and power distribution to accommodate the studio's existing loads and the expansion.
- Surge protection for the electrical service.
- "Tech" power distribution for control rooms, including an isolation/shielded transformer.
- Grounding for electrical service and "Tech" power.
- Lighting for lounge, reception, offices, and general areas and provisions for lighting in other spaces.
- Site lighting for the parking lot and building perimeter.
